# Standard Product Overview

# Conditions & Warranty of Sale

## Contact Information

### Dear Customers,

Our catalog covers a wide range of signs available for your agency. These signs are illustrated as closely as possible to the original you will receive. We use only high quality backing material and 3M Sheeting that are made to withstand all conditions.

Since 1997, Oregon Corrections Enterprises Sign Shop has operated as a modern sign shop facility. We have manufactured thousands of signs, offering numerous savings to Oregon State Agencies and government organizations throughout the Northwest. Our crews are made up of highly skilled artists and signage professionals for your design, layout, and manufacturing needs. Control points are located at each stage of our production process to ensure you the highest quality signs available. We are committed to your total satisfaction.

All Federal Highway, Oregon Department of Transportation, Oregon State Parks & Recreation, and Oregon State Marine Board signs are constructed to meet their standard specifications.

We also manufacture custom signage to your exact requirements. If you have a special need for a custom sign, we will be happy to provide drawings with design options and detailed descriptions for your approval. Feel free to call and inquire about our custom signs.

We look forward to providing you with your sign needs,

Our signs are to be free of defects in workmanship. Seller shall not be liable to Buyer for incidental or consequential damages, including damages, direct, or indirect, arising from the use of or inability to use its products.

Seller's sole obligation is limited to replacing or restoring the defective products or refunding to Buyer the amount paid therefore of Sellers products containing mis-spelled words (unless copy is provided by the customer and contains misspellings), delaminating of reflective sheeting, flaking, peeling of inks, improper mounting holes, or other major defects.

Seller warrants only to its Buyer that products sold hereunder conform to the description on the face hereof, no other warranties expressed or implied, including warranties of merchantability and fitness for a particular purpose are made by Seller. The foregoing provisions do not apply in states where prohibited.

Cash, Checks, Credit Cards and Purchase Orders are gladly accepted. In addition, we offer Direct Billing to all Government Agencies.

### Freight Charges:

OCE Sign Shop will pre-pay shipping charges and add them to the invoice if requested, using the carrier and method of our best judgment unless instructions are provided on the order.

### Shipping:

All orders are shipped F.O.B. Ontario, Oregon or we ship daily using UPS, 2nd Day Air®, including local and long distance truck lines to ensure the best possible rates and delivery times.

### Errors or Shortage:

All claims for shortages or errors in shipping must be made within five (5) days of receipt of shipment.

We look forward to providing you with your sign needs,

We take pride in our high quality products and the process for which we produce our signs. We use only the highest quality 3M™ films and sheeting of various sizes, colors, and types for specific, durable, and cost effective applications. We hand "Lay-Up" colored films and sheeting using negative and/or positive weeding methods to achieve the quality you and your company demand. Let our competent skilled employees design your signs. We have a library of information pertaining to Federal, State, and Local regulations. You can be sure our signage groups will provide the highest quality and longest lasting signage for your dollar.

### Sheeting and Common Usages

- **ENGINEERING GRADE – Durable Enclosed Lens Reflective Sheeting**  
... Used for standard traffic and sign applications.
- **HIGH INTENSITY GRADE – Durable Encapsulated Lens Reflective Sheeting.**  
...Used on standard State and Federal Highway signs.  
...Clearly visible at wide angles to approaching drivers.
- **DIAMOND GRADE – Durable Highly Reflective Micro prismatic Lens Sheeting.**  
...VIP – Highly visible in the range of 200 to 600 feet.  
... Ideal for signs in locations with relatively short viewing distances.
- **Roadside and extruded panel signs**  
... LDP – Highly visible with signs in excess of 600 feet.  
...Used on overhead highway signs.
- **DIAMOND GRADE FLUORESCENT**  
...Durable Highly Reflective Fluorescent Micro prismatic Lens Sheeting.  
...Used where very high visibility is required.  
...Construction and school zones.  
...Day and night time applications, low visibility periods.  
...Dawn, dusk, and overcast conditions

### Films, Overlay and Common Usages

- **PROTECTIVE OVERLAY - Durable Transparent Film**  
...Used to cover and protect signs from vandalism.
- **SCOTCHCAL – Non-Reflective Film.**  
...Used on commercial and custom signage
- **ELECTRO CUT – A translucent colored film used for application over High Intensity and Diamond Grade sheeting.** Screen Printed signs are also available in Standard and Custom type
- **Substrates – Material that provides the structural integrity for a sign.** Commonly referred to as "BLANK".
- **¾" HDO (High Density Overlay) PLYWOOD**  
...Used for all types of outdoor and highway signs
- **Our HDO signs are radius cut and smooth sanded, then edge sealed with an approved sealant for lasting protection.**
- **Routed, Laminated, Painted, and Custom design signs.**
- **Other custom woods are available**
- **ALUMINUM BLANKS**  
...Common Thickness - .063 / .080 / .125
- **Generally sign dimensions over 36" are .125"**
- **EXTRUDED ALUMINUM**  
...Aluminum panels used for Overhead & Roadside State Highway, Parks, and Interstate signs
- **PLASTIC**  
...Wildlife, Campground, ADA (Engraved/ Braille)
- **FOAM**  
...Used for lightweight custom and routed signs
- **HDU – High Density Urethane**
- **MDU – Medium Density Urethane**
- **LDU – Light Density Urethane**
- **BANNERS**  
...Designed and Custom made to your specifications

### The Process of creating a Sign

- We use AutoCAD® (Computer Aided Drafting) to determine the best layout, graphics, text, and letter placement per your design specifications and local regulations.
- We fax a scaled drawing of each sign design (with options) for your approval.
- Our CAD program plots the text and graphics to cut films and sheeting.
- Cutting the substrate, we sand and seal the edges (HDO), then prepare the substrate to be covered completely with a layer of press rolled film such as Hi-Intensity.
- The text layer is weeded by hand using positive or negative weeding methods as per requirements. This layer is transfer taped, positioned onto the sheet-covered substrate, and roll pressed under high pressure to assure smoothness and positive contact in accordance with manufacturers specifications.
- Our signs go through several Quality Check inspections throughout the entire process to ensure uniformity of our signs.
- Our signs are not finished until they have been closely inspected once again, approved, and packaged using a special 3M™ sheeting to protect from shipping damage.
- We ship UPS, Commercial carrier, tracking your order as needed.

**You have our Guarantee on every sign!**

American Disability Act compliant signs are generally used to identify rooms and facilities. Various ADA symbols are available.

Several symbols may be placed in a sign to identify multiple features. A 90% contrast between colors is required for the visually impaired. Braille is optional.

Adhesive strips can be placed on the back of the sign for surface mounting. Various font types are available. Clear San Serif block letters are required by Federal Standard for visual clarity. Choose from a variety of colors and sizes. We also sell frames.

## Oregon Department of Transportation School Signs

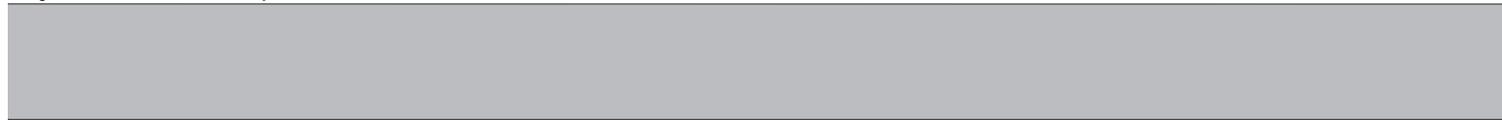

Model / Sample	Item Number Dimensions	Model / Sample	Item Number Dimensions
<p>School Signs have a Fluorescent Yellow/Green VIP Diamond Grade SCHOOL heading on a White High-Intensity Grade background and Black Electrocute SPEED 20 face. The diamond grade heading amplifies the awareness of the school zone to the driver. VIP Diamond Grade is ideal for signs in locations with relatively short response distances. And is highly visible in the viewing range of 200 to 600 feet.</p>	S5-1		S5-1
