

OCE BUS SHELTERS

Durable, Affordable, and Safe.

Aluminum construction and easily installed, OCE bus shelters are designed to fit perfectly into any community. Available with a variety of tempered glass and customizable paneling, these engineer-approved bus shelters provide durability for all weather environments. With a built-in gutter system, OCE bus shelters take the wet out of Oregon rain. Other optional pieces include bicycle shelters, bike racks, and smoking shelters. Go green with optional LED lighting and solar panels. Display route schedules, notifications, updates, and more in an optional stainless steel information case. OCE bus shelters are also designed, sourced, and built locally, contributing right back to the Oregon economy.

OCE BUS SHELTERS ARE so much more than a spot to stay cool or dry. With high quality OCE signage, you can brand your shelters with durable, colorful, and informative displays. Communicate transit line information and bus schedules as well as safety information and prohibitions for riders. You can also provide convenient bike lock areas that allow another subset of riders to utilize public transit. Keep the area clean by managing trash and debris with lockable recycling and trash receptacles. These durable depositories are proven, standing the test of time in the high-use parks and recreation areas from the Oregon coast to the high desert and out in the wilderness and rain.
