

Alta Standard Chairs & Stools

Seek greater heights with Alta Guest Seating. The Alta Standard Chair blends brains and beauty by offering sensible features like a field-replaceable seat and back, a kickback leg design for enhanced stability, and a polypropylene back shroud. These features don't just make your new furniture more durable; they keep it looking new year after year.

In addition to armless and armchair options, Alta Standard is available with three base options: a 4-leg base with kickback legs allows it to be stacked 4 high on the floor or 10 high on an optional dolly, a 4-leg base

with Wall Saver legs that are angled to keep the entire back of the chair a safe distance from the wall behind it, and a sled base for a more contemporary look.

The Alta family also offers two styles of ganging hardware, which allow you to maintain neat rows of seating in meeting or presentation arrangements regardless of the leg or arm options you select. The 4-Leg Alta Standard Chair can also be reimagined as a Café Stool with a 29½" seat height with or without arms.

Glides of non-skid rubber are ideal on tile, wood and other hard floor surfaces.

Café stools bring the form and function of Alta Standard Chairs to even greater (29½" seat) heights.

Steel wire seat and arm gangers allow chairs to be securely and discretely attached.

The Alta dolly holds up to 10 Standard or Basic Chairs making them even easier to transport and reconfigure.

Alta Basic, Alta XL & Tablet Arms

A variety of standard-height Alta models means that, regardless of your needs, you will never have to settle for less.

Alta Basic uses a curated option menu to bring the versatility and durability of the Alta Standard Chair to more budget-conscious users. Despite its elegant curved arm and front leg, Alta Basic is built to last. It uses the same 13-gauge steel frame members and 9-ply seat board as the Alta Standard Chair, and can also be stacked up to 4 high on the floor or 10 high on a dolly.

The Alta Tablet Arm Chair is a simple all-in-one solution for classrooms and

training rooms. It adds a flip-up tablet arm to the Alta Standard frame, creating a 20 $\frac{3}{8}$ " x 12" writing surface that is there when you need it and flips out of the way when you don't. The tablet arm is welded to the frame so that it is every bit as permanent and durable as the rest of the chair.

Alta XL doubles down on Alta's strengths, making every guest feel welcome with an expansive 30" x 20" seat, which is accompanied by a thicker frame and seat board. A continuous-use rating also gives Alta XL a place in healthcare settings and other environments that see guests 'round the clock.

The flip-top tablet arm moves out of the way to maximize user space when entering or exiting the chair.

Steel glides are perfect for carpeted floors where they move smoothly without snagging.

A Wall Saver leg option helps prevent marring the walls by keeping backs a safe distance from them.

The poly back shroud complements every fabric and provides exceptional durability against scuffs and scrapes.
