

BREATHE[®] Task Seating

BREATHE TASK CHAIR

Today's fast-paced office is the perfect place for the contemporary style and unmatched comfort of Breathe Seating. Sleek styling makes the high-back task chair at home in any organization.

The Breathe line features a sculpted polypropylene back structure rapped with a double layer of nylon mesh fabric for ultimate support and breathability. A contoured foam seat covered with the same soft and durable 2-ply athletic mesh improves ventilation and reduces fatigue.

For even more comfort, users can adjust the seat height and back tension of the chairs with an easily accessible knob and lever beneath the seat. The Task and Guest Chairs also include an adjustable lumbar pad that is built into the chair frame for extra durability.

Lastly, the Breathe Task Chair features a synchronous knee-tilt mechanism with a 2:1 (back-to-seat) ratio. The tilt-lock lever can be set in any of 3 lock positions or remain unlocked, allowing the seat to free float.

Height- and width-adjustable arms or height-adjustable fixed-width arms make it easy to find the perfect position.

The task chair's optional headrest can be positioned to offer all users customized comfort.

A synchronous knee-tilt mechanism, back tension knob, and seat height adjustment are standard on Breathe Task Seating.

The Breathe Task Chair's 5-star aluminum base offers built-in molded slip/scuff protectors and dual-wheel carpet casters.
