BREATHE® JR. Task Seating

Breathe Jr. Task & Breathe Sled Guest

Across the Breathe line, soft padded arms and lumbar support further enhance comfort. The unique lumbar pad of the Breathe Jr. can be easily adjusted vertically and horizontally from a seated position.

Complementing the other members of the line, the mid-back Breathe Jr. distills contemporary style to bring it to an even wider audience. In addition to its clean lines, Breathe Jr. offers seat height adjustability and a synchronous knee-tilt mechanism that free floats or locks in the upright position.

Breathe Guest Chairs provide the perfect counterpoint to the task chairs. Not only do they bring a unified look to office spaces, they allow guests to experience the same comfortable, contemporary Breathe seat and back.

Employees in the modern office spend a lot of time at their desks, making comfort and productivity key concerns. Now you have a seating option that offers all the style and grace of fine office seating for every budget—a truly refreshing proposition.

Height-adjustable arms are standard on the Breathe Jr. Task Chairs, but height- and width-adjustable arms are also available.

Vertically and horizontally adjustable lumbar support is integrated into the frame of the Breathe Jr. back.

Breathe Jr.'s mechanism offers seat height and back angle adjustments, controlled by the paddles beneath the seat.

Breathe Guest Chairs come equipped with glides to help protect the floor and chair frame.
