

# OCCUPY™ Task Seating

Make your presence known. Thriving in today's workplace requires vision and bold action at every level. Occupy Task Seating helps you make a statement whether you are using it for intensive solo tasks or in cooperative group settings.

Like a well-crafted opening line, the reinforced nylon frame and mesh back are sure to garner attention, but the true value of Occupy lies in the more subtle arguments it makes.

A self-weighting mechanism that calibrates reclining resistance to the user's weight, plush molded foam seat, and mesh back that conforms to the user over the full length of the spine provide intuitive comfort. Occupy's height-adjustable seat and

arms also ensure an appropriate fit for a wide variety of users.

In addition to height adjustability, the under-seat controls include a second lever that allows the backrest tilt mechanism to move freely, or locks it out in one of four positions. A striking 5-star base with dual-wheel high-impact casters provides unsurpassed stability and ease of use on carpeted surfaces.

Wrapping these arguments for comfort in a sophisticated tapered silhouette and subtly patterned Cool Grey or Black mesh make them all the more memorable. The future is yours for the taking; when you decide to stand up and seize it, you will find a ready ally in Occupy.

A reinforced nylon frame supports the Cool Grey or Black mesh insert creating a bold visual statement from any angle.

Occupy's mechanism adjusts the resistance to reclining based on the user's weight, eliminating the need for a tension control knob.

Height-adjustable arms offer a 2½" range to provide every user with a perfect fit for intensive tasks.

A 5-star base with a 26" diameter provides stability without making the chair cumbersome or unwieldy.
